Document Control

Document title	RTHC Coordinator User Manual
Document version	1.0
Issue date	05 November 2026
Applies to	RTHC application, coordinator role, daily headcount workflow
Intended readers	Coordinators assigned to a company and location in RTHC
Owner	Head Office, DMCFS Pvt. Ltd.
Review cycle	Review whenever the RTHC screens, schemes or workflow change, and at least once a year

Revision History

Version	Date	Description	Approved by
1.0	05 Nov 2026	First issue of the coordinator user manual, rewritten to standard corporate format with verified screen references.	Head Office

Scope

This manual covers the coordinator workflow only: signing in, verifying assignment, recording the daily headcount, reviewing history, and escalating issues. Administrative functions such as user management, company setup and system settings are documented separately and are outside the scope of this manual.

> **CONFIDENTIAL**
> The workforce data in RTHC is company information. Do not copy, photograph, forward or share screens outside your assigned duties.

A Quick Reference Card

B Glossary

1. About This Manual

This manual is a practical guide for RTHC Coordinators. It explains what to do, in the order you do it, and what the screen should show at each step. Screenshots in this manual are taken from the current RTHC application.

1.1 How to use this manual

- **New users** should read Chapters 2 to 6 before submitting their first entry.
- **Daily users** can use Chapter 6 and the Quick Reference Card in Appendix A.
- **Anyone with a problem** should go to Chapter 10 (Troubleshooting) before contacting Head Office.

1.2 Conventions used

Convention	Meaning
Bold field name	A label or button as it appears on screen.
Key	A keyboard key.
Numbered steps	Actions to perform in order.
Note / Caution / Tip boxes	Additional information, risks to data, and practical advice.

2. Overview of RTHC

Real-Time Head Count (RTHC) is the DMCFS system coordinators use to report workforce requirements, filled positions and vacancies for their assigned company and location. Head Office uses these figures to see actual manpower status and to spot staffing gaps before they affect operations.

What RTHC gives you

- A single, timed daily record per shift
- Automatic vacancy and utilisation calculation
- Your own submission history and trend view
- An immediate confirmation of every submission

Why accuracy matters

- Head Office plans recruitment from these figures
- Wrong numbers lead to wrong staffing decisions
- Late reporting hides vacancies until they cause delays

2.1 Your role as a coordinator

As a coordinator you are responsible for reporting accurately for **your assigned company and location only**, and for submitting the daily headcount on time. You do not need to change company, location or user settings. If any of these look wrong, contact Head Office (see Chapter 12).

3. Before You Begin

3.1 What you need

Item	Details
Device	Desktop, laptop, tablet or mobile phone
Browser	Google Chrome, Microsoft Edge or another current, up-to-date browser
Internet	A stable connection. The dashboard shows a **Live** indicator when it is connected.
Login details	User ID or email and password issued by Head Office
Website address	[Official RTHC website URL – to be confirmed by Head Office]
Today's figures	Requirement and filled counts for your shift, confirmed before you start

> **TIP**
> Have your shift's requirement and filled counts ready before you open the form. This keeps the entry quick and reduces corrections.

3.2 Confirm you are on the correct site

Before you enter any credentials, check that the page belongs to the DMCFS RTHC platform. The sign-in page shows the RTHC logo and the title *Workforce Intelligence in Real-Time*. If the page looks different, do not sign in. Contact Head Office.

4. Signing In

Open the RTHC sign-in page in your browser and follow the steps below.

1. **Open the sign-in page** at the official RTHC address.
2. **Enter your email or user ID** in the **Email address** field, as provided by Head Office.
3. **Enter your password** in the **Password** field. Select the eye icon to show or hide the password while you type.
4. **Select Sign In.** Wait for the coordinator dashboard to load.

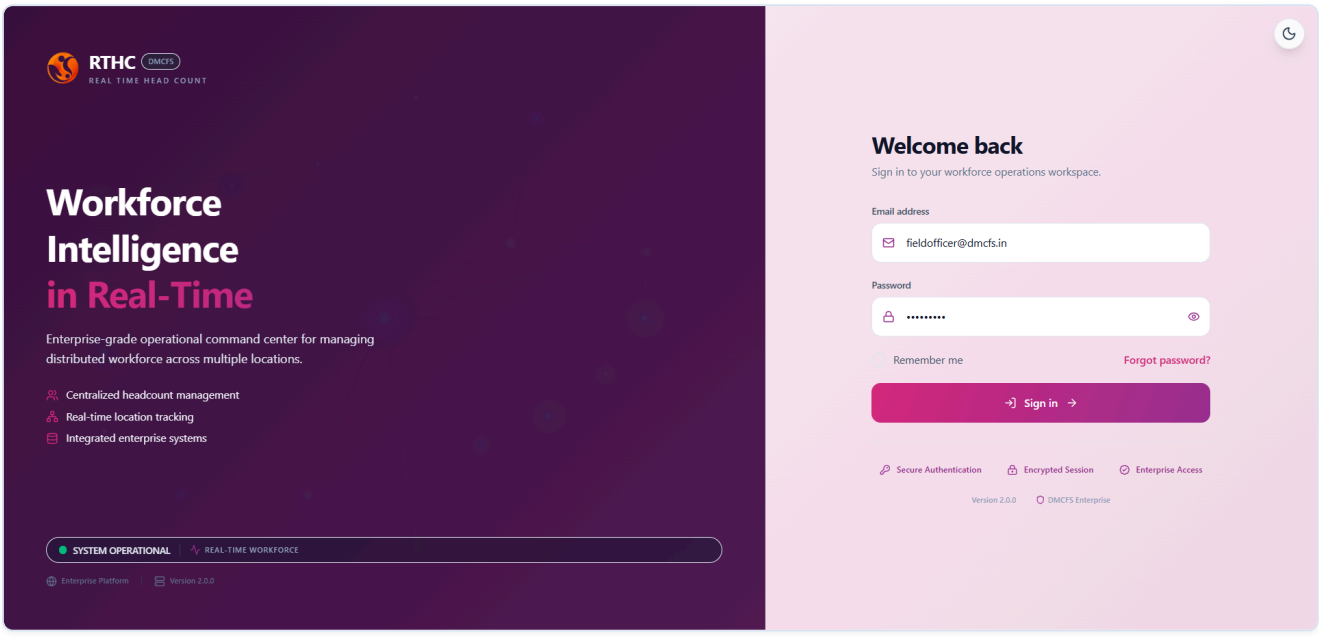

Figure 1: RTHC sign-in page

> **CAUTION**
>
> Your login is issued to you personally. Never share your user ID or password, and never sign in on behalf of another coordinator.

4.1 Forgotten password

If you cannot remember your password, contact Head Office rather than repeatedly guessing it. Contact Head Office to request a reset. The sign-in page also has a *Forgot password?* link.

5. The Coordinator Dashboard

After sign-in, the coordinator dashboard opens. The top bar and the summary cards show your assignment and the current position.

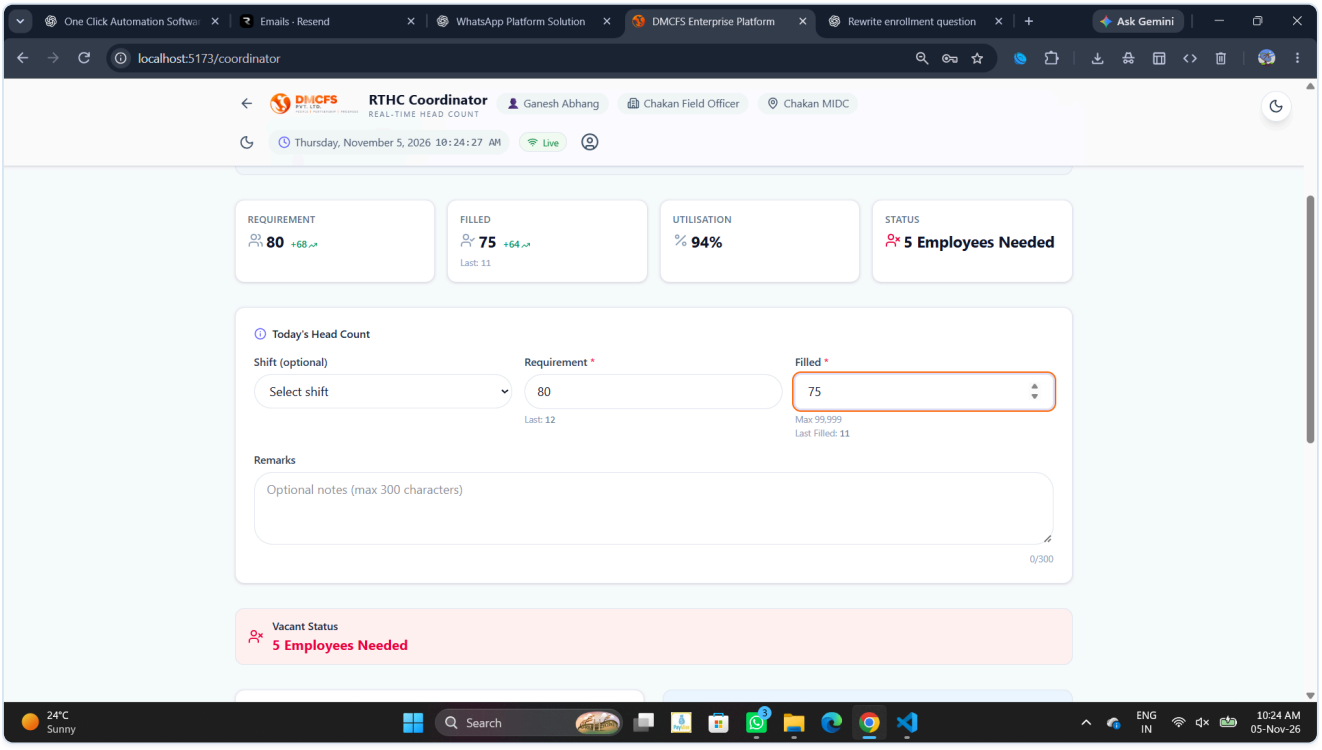

Figure 2: Coordinator dashboard with assignment details and headcount summary

5.1 Verify your assignment

Before you enter any figures, check the top bar:

Field	What to check
Coordinator name	Shows your name. Example: *Ganesh Abhang*.
Company	Shows your assigned company, for example *Chakan Field Officer*. This field is locked and labelled *Assigned*.
Location	Shows your assigned location, for example *Chakan MIDC*. This field is locked and labelled *Assigned*.

> **STOP**
> If the company or location is not yours, do not submit anything. Contact Head Office first.

5.2 Summary cards

Card	Meaning
Requirement	Total workforce required for the current entry.
Filled	Positions currently occupied. The small *Last* value shows your previous filled count.

Utilisation	Filled as a percentage of requirement.
Status	The current balance. See Chapter 8 for the status messages.

5.3 Your last entry

A panel labelled *Your Last Entry* shows the date, time, requirement and filled count of your most recent submission. Use it as a reference when you enter today's figures.

6. Submitting the Daily Headcount

Complete the steps below for each shift you report. Each submission is recorded with its own time stamp.

6.1 Select the scheme

1. In the form, locate the **Scheme *** dropdown. The asterisk means the field is required.
2. Select the scheme that matches the workforce you are reporting.
3. Confirm the selection before you enter any counts.

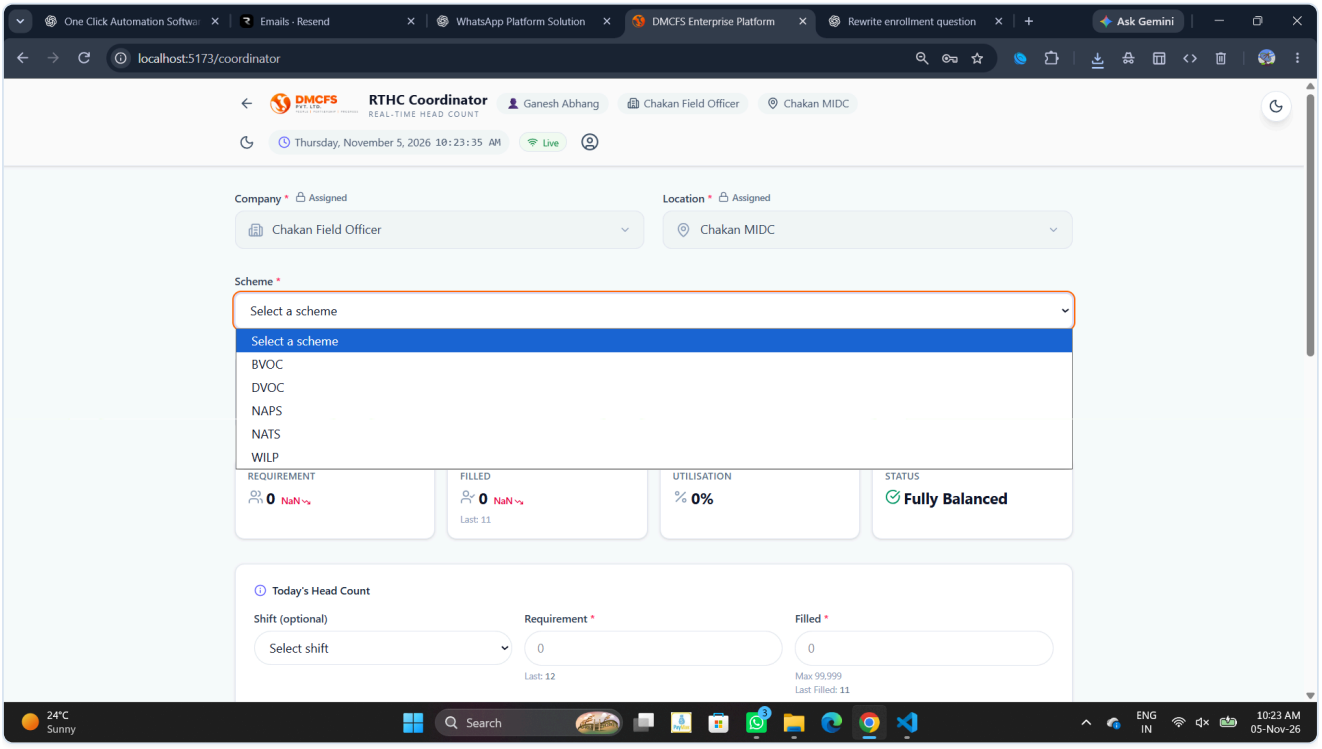

Figure 3: Scheme dropdown. Schemes shown: BVOC, DVOC, NAPS, NATS and WILP. Your list may differ by assignment.

> **NOTE**
> The scheme list depends on your assignment. If the scheme you need is missing, contact Head Office instead of choosing a different one.

6.2 Select the shift

1. In **Today's Head Count**, open the **Shift (optional)** dropdown.
2. Select the shift you are reporting, for example Morning, Mid or Night.

The shift field is optional in the current form, but select it whenever the entry relates to a specific shift. This helps Head Office compare shifts.

6.3 Enter the requirement and filled count

1. In **Requirement ***, enter the total number of workers required for the shift.
2. In **Filled ***, enter the number of positions currently occupied.

Both fields are required. Each field accepts whole numbers up to 99,999. Beneath each field, the form shows the *Last* value so you can compare with your previous entry.

6.4 Add remarks (when needed)

Use the **Remarks** box to explain any unusual situation, such as absences, a new joining, or a planned change. Remarks can be up to **300 characters**. Remarks are optional, but add them whenever a figure differs sharply from the previous entry.

6.5 Review the live figures

Before you submit, look at the panels below the form:

- **Status** and the **Smart Suggestion** panel show whether the workforce is balanced, short or in surplus.
- **Live Analytics** shows the requirement against the filled count and a trend of recent entries.

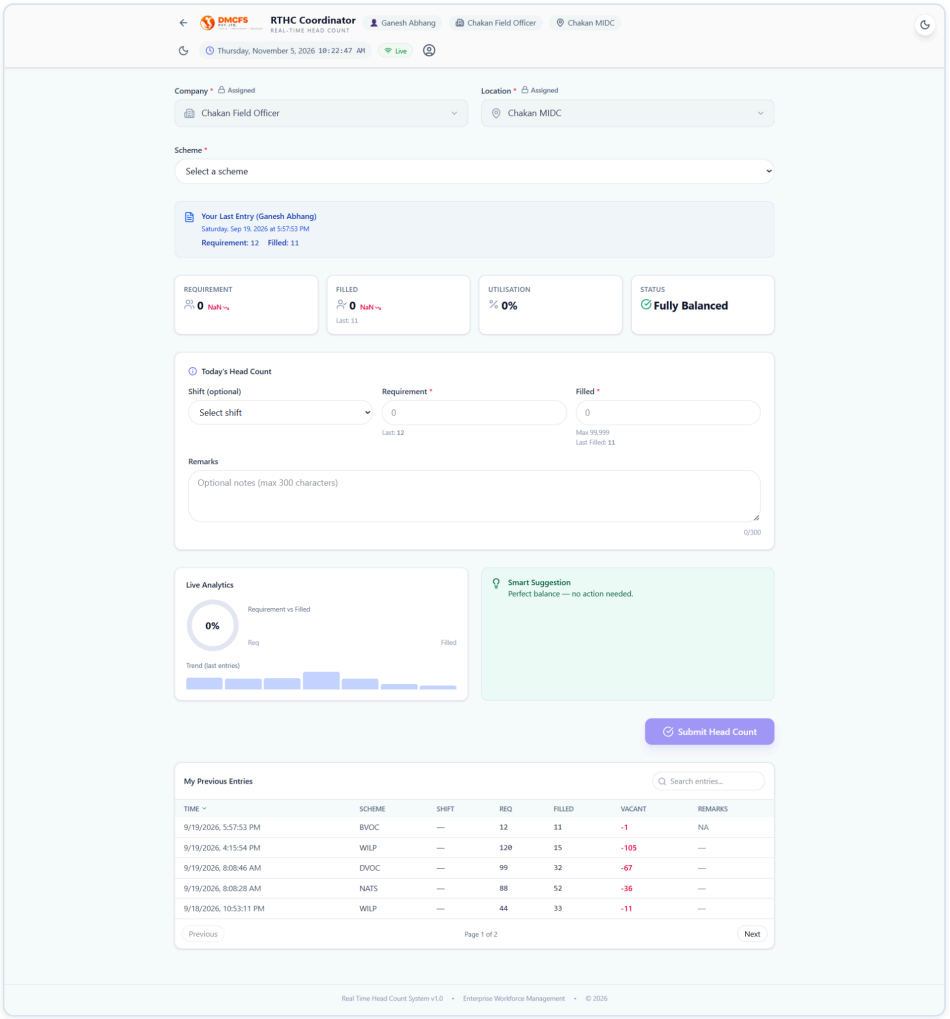

Figure 4: Full coordinator page showing the entry form, live analytics, Submit Head Count button and previous entries

6.6 Submit

1. Check every value against your source figures.
2. Select **Submit Head Count**.
3. Wait for the confirmation popup. Do not select the button a second time while the form is processing.

6.7 Confirm the submission

A **Submitted Successfully** popup shows the details that were saved:

Popup field	Description
Company and Location	The assignment the entry was saved against
Shift	The shift you selected
Requirement and Filled	The figures you entered
Vacant	Requirement minus Filled (see Chapter 8)
Time and Submitted by	The date, time and coordinator name recorded

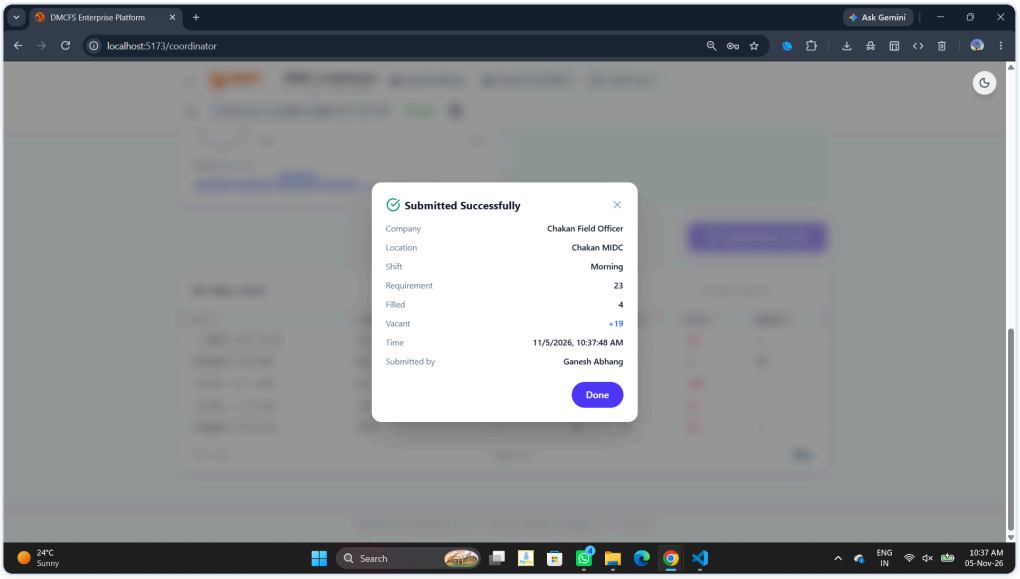

Figure 5: Submission confirmation popup

TIP

Check the popup against what you intended to submit, then select **Done**. If a value is wrong, report it to Head Office immediately rather than submitting a second entry for the same shift.

CAUTION

If the confirmation popup does not appear, the entry may not have been saved. Check *My Previous Entries* (Chapter 7) before you resubmit, to avoid duplicates.

7. Reviewing Previous Entries and Analytics

Use the history and analytics to confirm what has been recorded, spot patterns and catch duplicates.

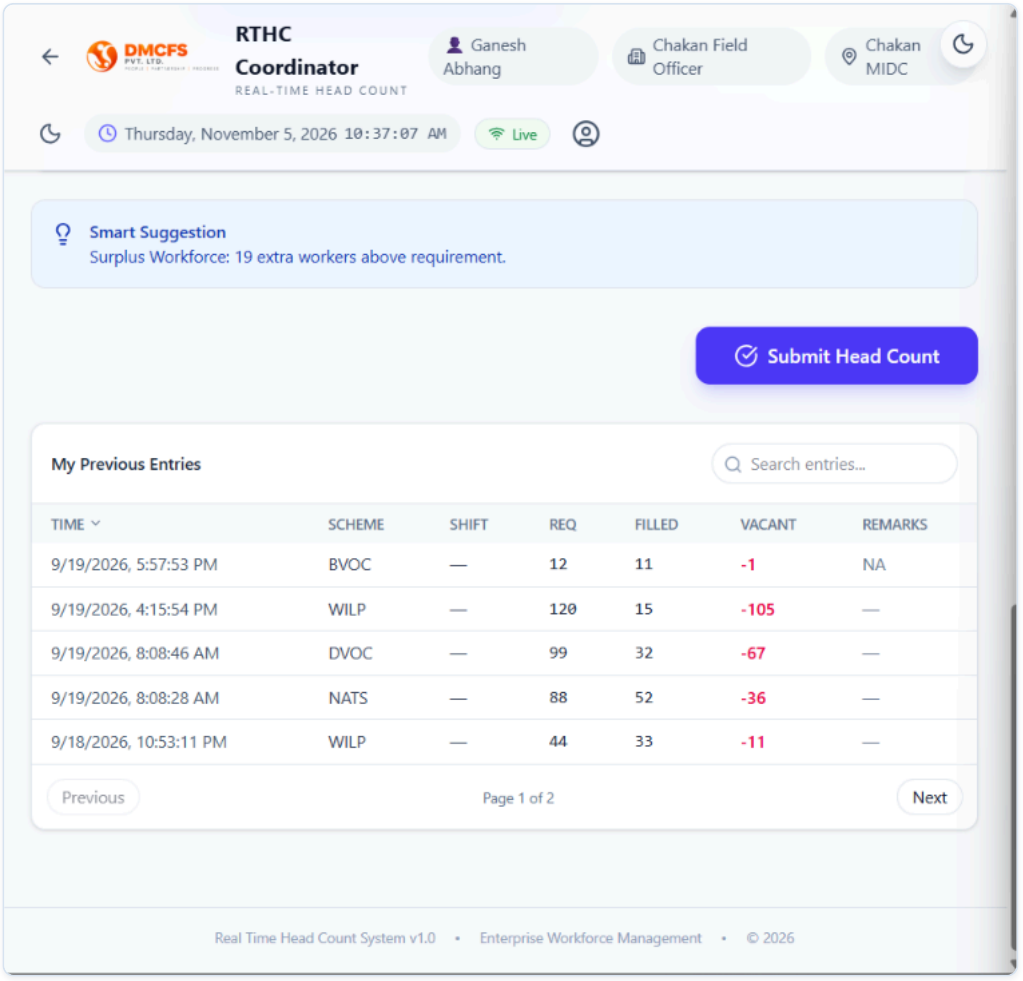

Figure 6: Previous entries and analytics panel

7.1 My Previous Entries

1. Scroll to the **My Previous Entries** table.
2. To find a specific record, type in the **Search entries...** box.
3. To view older records, select **Next** or **Previous** at the bottom of the table.

The table shows these columns:

Column	Description
Time	Date and time of submission
Scheme	Scheme selected for that entry
Shift	Shift reported, where one was selected
Req	Requirement entered
Filled	Filled count entered

Vacant	Requirement minus Filled. A negative value means surplus.
Remarks	Remarks entered, or a dash (—) if none

7.2 Analytics

The **Live Analytics** panel shows the utilisation ring, requirement against filled, and the trend of recent entries. Use it to see whether your filled count is moving toward or away from the requirement.

> **NOTE**
>
> Figures in the history table are the records you submitted. If a record is missing or wrong, report it to Head Office; do not try to edit it yourself.

8. Understanding the Headcount Figures

8.1 Calculations

Measure	How it is calculated	Example
Vacant	Requirement − Filled	23 − 4 = **+19** vacant
Surplus	Shown as a negative Vacant value	12 − 11 = **−1**, which is 1 surplus
Utilisation	Filled ÷ Requirement × 100	75 ÷ 80 = **94%**

8.2 Status messages

Status shown	Meaning and action
Fully Balanced	Filled equals requirement. No action needed.
N Employees Needed	Filled is below requirement by N. Confirm the figures and report the shortfall through your normal channel.
Surplus Workforce	Filled is above requirement. Confirm the figures. Add a remark explaining the surplus if it is unexpected.

CAUTION

Status messages are calculated from the figures you enter. They are only as accurate as your inputs. A wrong requirement will produce a wrong status.

9. Data Accuracy Standards

Accurate, timely entries are the foundation of workforce planning. Follow these standards for every submission:

1. **Verify assignment first.** Confirm company and location before entering any figures.
2. **Select the correct scheme** before entering counts.
3. **Count on the ground.** Use the current headcount for the shift, not yesterday's figure.
4. **Check the calculation.** Confirm that Vacant equals Requirement minus Filled.
5. **Explain the unusual.** Add a remark for large changes, surplus, or a shortfall that needs context.
6. **Confirm the popup** and check the entry in My Previous Entries.
7. **Submit on time** according to the reporting schedule set by Head Office.

> **TIP**
> Before submitting, read the values aloud against your source sheet. Most errors are a transposed digit or a wrong scheme.

10. Troubleshooting

Find the symptom below. If the suggested action does not resolve the issue, contact Head Office.

Symptom	Likely cause	What to do
Cannot sign in	Wrong user ID or password, or account not active	Re-check the ID and password, including capital letters. Then contact Head Office.
Forgotten password	Password not remembered	Select *Forgot password?* or contact Head Office for a reset.
Wrong company or location	Assignment is incorrect	Do not submit. Contact Head Office.
Scheme missing from the list	Scheme not assigned to you	Do not select another scheme. Contact Head Office.
Submit button does nothing	A required field is empty or invalid	Check that Scheme, Requirement and Filled are completed. Check that counts are whole numbers.
No confirmation popup	Submission may not have saved	Check My Previous Entries before resubmitting. Report to Head Office if the entry is missing.
Duplicate entry	Submitted twice	Report to Head Office with the time stamps. Do not submit a correction without approval.
Page not loading or *Live* indicator missing	Connection or browser issue	Refresh the page. Check your internet connection. Try another supported browser.

11. Security and Data Protection

- Keep your user ID and password private. Never share them, write them on paper left at your desk, or save them on shared devices.
- Use only authorised work devices to access RTHC.
- Do not leave the dashboard open and unattended on a shared screen.
- Sign out when you finish your session, especially on shared or public computers.
- Do not export, photograph or forward workforce data outside your assigned duties.
- Report any suspected unauthorised access or data concern to Head Office immediately.

12. Getting Help and Escalation

Contact Head Office at once if you face any of the following:

- Login failure or a forgotten password
- Incorrect company or location
- A missing scheme
- Wrong headcount figures already submitted
- Unsuccessful submission or a missing confirmation

Head Office support

Contact person	Mr. Pranav Phalke, Head Office
Phone / email	[To be added by Head Office]
When to call	As soon as the issue is noticed. Do not wait until the end of the day.

12.1 What to include when you report an issue

- Your name and assigned company and location
- Date and time of the issue
- What you were doing and what you saw (a screenshot helps)
- Any confirmation popup or error message shown

Appendix A. Quick Reference Card

Daily submission in 8 steps

1. Sign in and confirm the company and location at the top.
2. Select the **Scheme**.
3. Select the **Shift**.
4. Enter **Requirement**.
5. Enter **Filled**.
6. Add **Remarks** if the figure is unusual (max 300 characters).
7. Check Status, Live Analytics and the figures. Select **Submit Head Count**.
8. Confirm the popup, then check **My Previous Entries**.

Formulas

- Vacant = Requirement − Filled
- Negative Vacant = Surplus
- Utilisation = Filled ÷ Requirement

Stop and call Head Office if

- Company or location is wrong
- You cannot sign in
- The popup does not appear
- An entry is wrong after submission

Appendix B. Glossary

Term	Definition
Assigned company	The DMCFS company for which you report headcount.
Assigned location	The work site for which you report headcount.
Coordinator	A user who submits daily headcount for an assigned company and location.
Filled	The number of positions currently occupied.
Head Office	The DMCFS team that manages RTHC and provides user support.
Requirement	The total number of workers needed for a shift.
RTHC	Real-Time Head Count, the workforce reporting system described in this manual.
Scheme	The training or workforce programme the entry relates to, such as BVOC, DVOC, NAPS, NATS or WILP.
Shift	The work period the entry covers, such as Morning, Mid or Night.
Surplus	Filled is greater than Requirement, shown as a negative Vacant value.
Utilisation	Filled as a percentage of Requirement.
Vacant	Requirement minus Filled. The number of positions still to be filled.

End of document.
